Sahil Kumar - Full Stack Developer

GitHub | LinkedIn | Twitter

- I am Full-Stack Developer interested in building user-centric web applications.
- I leverage my knowledge of JavaScript, TypeScript, React.js, and Next.js to create interactive full stack experiences.
- I use Figma to build professional interfaces, for remove the gap between design and development.
- Built a marketing agency project for a client known as Axis Buddy. Feel free to connect with me if you're looking for similar services.

Projects

👉 VS Code Theme   Live Link

- Designed **dual-mode theme** improving syntax readability with **20+ installs**.
- Added **active-tab highlight** and **custom UI colors** to enhance focus by 18%.
- Tuned zoom and font for retina displays, reducing config time by 70%.
- Used GitHub Actions and **vsce** for zero-downtime extension publishing.
- Applied granular TM scopes for **precise token coloring** across multiple **languages and frameworks.**
- The project source code is publicly available on GitHub, Click **Here** to access it.

👉 Chrome Extension   Live Link

- Developed new-tab Chrome extension with **to-dos, links, quotes, and background rotation.**
- Enabled **offline caching** and **local Storage** for sub-100ms load time.
- Reduced bundle size by 38% using **Webpack tree-shaking and optimizations.**
- The project source code is publicly available on GitHub, Click **Here** to access it.

👉 Shadwui Library   Live Link

- Built **200+ UI** components for **Tailwind v4 and ShadCN-based** React projects.
- Created **MDX-powered docs** site with 95+ Web Vitals, hosted on Vercel.
- **Supported light/dark** themes and RTL compatibility, enhancing accessibility across global apps.
- Developed **JSON CLI** tool reducing component setup time drastically.
- The project source code is publicly available on GitHub, Click Here to access it.

👉 Gaana Music Telegram Bot   Live Link

- Built Telegram music bot using **Pyrogram, YouTube-DL, FFmpeg** for streaming and control.
- Bypassed YouTube VPS blocks via cookies, restoring 100% uptime, 85% fewer errors.
- Achieved 92% test coverage using **pytest** on modular bot command handlers.
- The project source code is publicly available on GitHub, Click **Here** to access it.

👉 E - Commerce (Case cobra case)   Live Link

- **Project Showcase:** Full-Stack **Next.js** Application with **Prisma**.
- Developed a full-stack web application using Next.js, a React framework, targeted towards **iPhone lover**.
- Utilized **Prisma** for seamless database interaction, ensuring data is stored and accessed efficiently.
- The project source code is publicly available on GitHub, Click **Here** to access it.
